Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

1> Attorney request for withdrawing of the finality from previous office rejection, due to the no teaching from Ohta-'277, for the features for the designating the reverse common channel to the reverse dedicated channel.

2> There was no agreement of the no teachings, due to broad feature for the "designating the reverse common channel to the reverse dedicated channel". Any assigning of traffic data channel to user terminal from commonly shared channels can be read-on as the above claimed feature.

Ohta-'277 teaches the common communication channels are assigned by central station to terminal station in accordance with the type of transmission signals requested from one terminal station (col. 18, lines 7-12), and the common signal channel which is assigned to terminal station has a upper time limit (col. 18, lines 48-53).

3> Attorney shall file a response for the no teachings.
